Dimensions
- Product dimensions (W x H x D): 421 x 158 x 139 mm
- Packaging dimensions (W x H x D): 484 x 220 x 158 mm

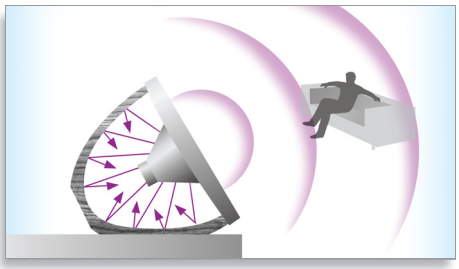
Highlights

Built-in rechargeable battery
Built-in rechargeable battery for even better portability

PureDigital

Advanced PureDigital sound processing technology offers vastly superior sound performance compared to the conventional analog audio processing technology that is found in docking players that use the analog audio output from an iPhone/ iPod. By collecting the iPhone's/ iPod's digital audio output and employing digital processing at each stage of the circuit, a much higher Signal-to-Noise ratio is produced. The result is unsurpassed sound clarity that is in perfect balance.

SoundCurve



The carefully designed curved back cover creates a highly effective acoustic structure for sound reproduction. Its clean curve enforces the rigidity of the speaker cabinet, dramatically reducing internal resonance and eliminating the vibration and distortion of sound. You get to enjoy superb crystal-clear sound in stunning looking speakers.

Optimal acoustic volume
Smart sound design brings you the best bass reproduction possible. The acoustic volume allocated to each midrange driver perfectly matches its acoustic requirements. Low tones come out deep and tight – delivering strong and rich bass.

Superb gaming sound effects
The gaming experience is never complete without great sound effects. Now your iPad, iPhone or iPod Touch games can be made even more thrilling - thanks to this Fidelio docking speaker that puts the boom into the sound. Hear all the sounds loud and clear, and boost your experience to new levels. What's more, you can do this with outstanding convenience, via Bluetooth. Simply make the wireless Bluetooth connection between your portable device and the docking speaker, and play away.

Video stand for iPad
Video stand for hands-free iPad movie enjoyment
